Associate or Full Professor

Biostatistician with a focus in Translational Research or general faculty position.

The Department of Family Medicine and Public Health (FMPH) at the University of California, San Diego, is committed to academic excellence and diversity within the faculty, staff, and student body. We invite applications for one or more partial tenured/partial In Residence faculty positions in FMPH’s Division of Biostatistics and Bioinformatics with a dual focus on collaborative and primary methods research. These positions will have partial state funding. The Department has need of outstanding statistical expertise across basic science studies, design and analysis of NIH-sponsored and/or FDA compliant clinical trials, image analysis, genomic and proteomic studies, prognostic modeling, statistical genetics and other areas. Opportunities are available for a leadership position within UCSD’s Clinical and Translational Research Institute as Director of Biostatistical Collaboration, and for a general faculty position with a substantial commitment to methodological biostatistical research.

The Division of Biostatistics and Bioinformatics sits within the research-intensive environment of UC San Diego School of Medicine, which has research funding of nearly $1 billion annually. The Division has a robust record of outstanding research in both methodological biostatistics and in interdisciplinary, collaborative biomedical research. The Division offers a PhD degree in Biostatistics, and we support major research initiatives in Alzheimer’s Disease, HIV/AIDS, Cancer, Pediatrics, and Public Health.

UCSD’s Clinical and Translational Research Institute provides a hub for basic, translational, and clinical research throughout the San Diego region. The Division of Biostatistics faculty within CTRI are responsible for Biostatistics education, consultation and collaboration, including outreach to research groups across UCSD School of Medicine, support of large research proposals and development of long term statistical collaboration.

The successful candidate(s) will have a strong track record of externally funded and impactful publication in collaborative biomedical research and a vigorous research program in statistical methodology. All research areas of biostatistics and applied statistics are welcome; excellent oral and written communication skills are required. Excellent managerial or administrative experience is preferred for the leadership position at CTRI; an outstanding program of relevant methods research and mentoring is preferred for the general position. Candidates must have a doctoral degree in Biostatistics, Statistics, or a closely related field and will be expected to teach in the PhD program in Biostatistics and/or in other Departmental initiatives. The Department is interested in candidates who have demonstrated commitment to excellence in teaching, research and service which contribute to an equitable, inclusive and diverse scholarly environment.

Salary is commensurate with qualifications and consistent with University of California pay scales. Review of applicants will begin on December 2, 2015, and the positions will remain open until filled.

Applications must be submitted through the On-line Application System, RECRUIT. Candidates may submit an application to one or both positions.

To apply, please provide a letter of interest, a CV, a statement summarizing research interests and teaching experience, a separate statement describing past experience in activities that promote diversity and inclusion and/or plans to make future contributions, three PDF copies of the most significant publications, and names and contact information of three referees. Please provide teaching evaluations if applicable.

**Applicants for the general Biostatistics faculty position**, please select the following open position:

FAMILY MEDICINE AND PUBLIC HEALTH

Biostatistics (Associate/Full Professor Ladder-Rank and In-Residence):
